

MTH 765P Mini-project

Your name here

1 Introduction

Here is where you introduce the dataset - what is it, where did you get it, etc. Here we will also see how to refer to figures, see Figure 1.

Figure 1: This is a figure.

2 Obtaining/Acquiring the Data

How did you get it? What did you need to do?

3 Description

More in detail than in the introduction – Here is a web address www.arxiv.org.

4 Analysis

Presentation of some aspects of the data (including visualisations)

Make sure to point out which libraries you used.

5 Questions

What would you do if you had to do more analysis on the dataset? Do you need additional data? Are there interesting questions that one could try to answer? Consider what would you do if this was a more in-depth project. Note here you should just think about possible directions (you do not need to follow up or justify them).
